- **Concepts:** OOP, DSA, DBMS, SQL, Deep Learning, Machine Learning, Generative AI
- **Cloud:** AWS

Projects

AutoCAD Agent – AI-Powered Floor Plan Generation <i>Python, LangGraph, Gemini, pyautocad</i>	December 2025 GitHub
• Built a LangGraph agent that converts natural language prompts into AutoCAD floor plans via a Planner–Coder–Executor pipeline. • Developed CAD primitives for walls, doors, windows, and stairs with automatic wall-cutting and junction-cleaning tools.	
Personal Portfolio – AI Projects & RAG Chatbot Platform <i>React, AWS (S3, CloudFront, EC2, Route 53, ACM, SSM), LangGraph</i>	February 2026 Live
• Built and deployed a personal portfolio hosted on jainilpatel.dev . • Developed a RAG-based chatbot using LangChain and LangGraph for answering queries over project-specific data. • Deployed frontend on AWS S3 with CloudFront CDN and configured domain via Route 53 with HTTPS (ACM). • Hosted backend APIs on EC2 and managed secrets securely using AWS SSM Parameter Store.	
Neuro Builder – No-Code Neural Network Designer <i>React, PyTorch, WebSockets</i>	May 2025 GitHub
• Built a no-code neural network builder with React and PyTorch for interactive model design and training. • Implemented real-time training logs using WebSockets for live monitoring of ML experiments.	

Achievements

- Top 10 finalist at Dhirubhai Ambani Institute of Information and Communication Technology hackathon.
- First prize at Innovators Assemble organized by Association of Computer Engineering Students at Nirma University.
- Scored 871/1000 in AWS Solutions Architect Exam and passed on the First Attempt.
